FDA Privileges

	DB2 UDB	Oracle	MySQL	SQLServer	PostgreSQL	TeraData	InfiniDB	Sybase IQ Sybase ASE	Netezza	GreenPlum	AsterData	Redshift
Connecting to remote database	CONNECT authority	CREATE SESSION privilege	Creating a user tied to a remote host who has ALL PRIVILEGES	CONNECT permission	CONNECT privilege	CONNECT privilege	Creating a user tied to a remote host who has ALL PRIVILEGES	No permission required to use the CONNECT statement	No privilege required	CONNECT privilege	CONNECT privilege	Creating a user linked to the AWS account
Creating tables	CREATETAB authority	CREATE TABLE privilege	CREATE privilege	CREATE TABLE permission	CREATE privilege	CREATE TABLE or TABLE keyword	CREATE privilege	RESOURCE authority and CREATE permission	TABLE privilege	CREATE privilege	CREATE privilege	CREATE privilege
Creating indexes	INDEX privilege	INDEX or CREATE ANY INDEX privilege	INDEX privilege	ALTER permission	CREATE privilege	CREATE INDEX or INDEX keyword	INDEX privilege	RESOURCE authority and CREATE permission	INDEX privilege	CREATE privilege	CREATE privilege	CREATE privilege
Creating functions	IMPLICIT_SCHEMA authority or CREATEIN privilege	CREATE PROCEDURE or CREATE ANY PROCEDURE privilege	CREATE ROUTINE privilege	CREATE FUNCTION permission	USAGE privilege	CREATE FUNCTION or FUNCTION keyword	CREATE ROUTINE privilege	RESOURCE authority or DBA authority for Java functions	FUNCTION privilege	USAGE privilege	CREATE FUNCTION privilege	USAGE ON LANGUAGE plpythonu privilege to be able to call external python scripts
Creating procedures	IMPLICIT_SCHEMA authority or CREATEIN privilege	CREATE PROCEDURE or CREATE ANY PROCEDURE privilege	CREATE ROUTINE privilege	CREATE PROCEDURE permission	USAGE privilege (procedures are functions)	CREATE PROCEDURE or PROCEDURE keyword	CREATE ROUTINE privilege	RESOURCE authority	PROCEDURE privilege	USAGE privilege	CREATE FUNCTION privilege	
Removing objects (tables, indexes, functions, procedures)	DROPIN privilege or CONTROL privilege or owning the object	DROP ANY <object> privilege *	DROP privilege	ALTER permission	Table: owning the table Index: owning the index Function: owning the function	DROP <object> * or object related keyword	DROP privilege	Owning the object or DBA authority	DROP privilege	Owning the object	Owning the object	Owning the object or being a superuser
Monitoring executions	EXPLAIN authority	INSERT and SELECT privilege and necessary privilege to execute the statement for which the EXPLAIN PLAN is based on	SELECT privilege	SHOWPLAN permission	No privilege required to use EXPLAIN statement	No privilege required to use EXPLAIN statement	SELECT privilege	Only a system Administrator can execute sp_showplan	No privilege required to use EXPLAIN statement	No privilege required to use EXPLAIN statement	No privilege required to use EXPLAIN statement	No privilege required to use EXPLAIN command
Writing data	INSERT and UPDATE privileges or DATAACCESS authority	INSERT and UPDATE or INSERT and UPDATE ANY TABLE privileges	INSERT and UPDATE privileges	INSERT and UPDATE permissions	INSERT and UPDATE privileges	INSERT and UPDATE privileges	INSERT and UPDATE privileges	INSERT and UPDATE permissions	INSERT and UPDATE privileges	INSERT and UPDATE privileges	INSERT and UPDATE privileges	INSERT and UPDATE privileges
Loading data into tables	LOAD authority	SELECT and INSERT privileges	FILE privilege	INSERT, ADMINISTER BULK OPERATIONS and ALTER TABLE permissions	SELECT and INSERT privileges	SELECT and INSERT privileges to respectively use COPY TO and COPY FROM statements	FILE privilege	be the owner of the table or ALTER permission Depending on the -gl option, LOAD TABLE might only be performed if the user has the DBA authority	SELECT and INSERT privileges	SELECT and INSERT privileges	SELECT and INSERT privileges	SELECT and INSERT privileges
Accessing to client data	INSERT/UPDATE privileges or DATAACCESS authority	SELECT or SELECT ANY TABLE privilege	SELECT privilege	SELECT permission	SELECT privilege	SELECT privilege	SELECT privilege	SELECT permission	SELECT privilege	SELECT privilege	SELECT privilege	SELECT privilege
Accessing to metadata	No authorization required to use DESCRIBE statement	No privilege required to use DESCRIBE statement	SELECT privilege	VIEW DEFINITION permission	No privilege required to use "\d table" command	SHOW privilege	SELECT privilege	No permission required to use DESCRIBE statement	No privilege required to use "\d table" command	No privilege required to use "\d table" command	No privilege required to use SHOW command	SELECT privilege

⚠ Depending on your needs and configuration, the necessary rights might be different from this list. The information contained in this document is subject to modification without prior notification. Check the official technical documentation of the database engine you are working with to get the latest information.

* <object> = TABLE, INDEX, FUNCTION or PROCEDURE
